

MS Office 2007 Support Matrix (as of 4/18/08)

Current Status	Current Status	Anticipated Support Timeframe	Comments
PS Financials	Version 7.5 not supported Version 8 supported (see comments); OIIT Internal testing to be conducted in May.	Will be supported with rollout of Version PSFIN V8 Fall 2008. DOES NOT INCLUDE CERTIFICATION FOR WINDOWS VISTA, ONLY XP.	Excel/Nvision has support caveat options: <ol style="list-style-type: none"> 1. Report server and workstation to be on same version 2. Workaround will be provided to end users during training Option 2 will be used until full certification from the vendor is released, as the expectation that end users all be on a single version of the Office product at the same time is unrealistic.
PS HRMS	Supported by the vendor. OIIT Internal testing to be conducted May 2008.	Became vendor-supported with rollout of V8. OIIT internal testing to be completed May 2008.	Supported on PeopleTools 8.48.08. This is the current version used with HRMS.
Banner	Supported by the vendor. OIIT Internal Testing not completed.	OIIT Internal testing not completed; to be completed by Fall 2008.	One issue noted on Sungard UDC Customer Support Center website: Running Oracle Reports that generate excel output and getting a warning message: Solution from Microsoft's website: http://support.microsoft.com/kb/948615/en-us
VISTA	Supported by vendor with migration to Vista 8 (formerly named Vista 4)	Issues identified when used with Vista 3x. Will be supported by vendor when fully migrated to Vista 8x	Several issues identified and corrected. Unresolved issues details are as follows: UNRESOLVED - GETTING THE BOOT: Opened with BtBb, August 23, 2007 (BtBb 479072)* In both Vista 3 & 4. Under specific circumstances, users of Office 2007 can get kicked out of Vista. (/When opening MS documents in Office 2007 applications while using Internet Explore r6 and 7. /Doesn't matter which version of Office created the document, but rather with which version is used to VIEW/OPEN it./) A computer using Windows, Internet Explorer, and Office 2007 can "open online" (aka not download to hard drive then open) Pre-Office 2007 files, however, upon closing the Office application, the session is lost. The next click will result in the user seeing the institution list. Bb has been working with Microsoft & Colorado State to develop debug patches, and is currently finalizing the timeline for this to be fixed in Vista 4. Fix for Vista 3 should follow soon after.
